

Model **N275** [Ultra Violet]

The NewDEL™ UV product group combines high performance and flexibility to serve both scientific and industrial research. Because most UV applications require increased levels of output, NewDEL™ UV are designed to deliver the highest radiant power possible from a one-millimeter diameter fiber.

VDC POWER O COMPANY MONITOR TRIGGER &

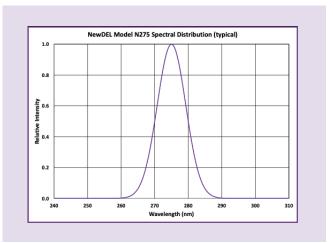

REAR PANEL

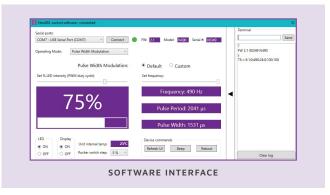

SPECIFICATIONS

- Central wavelength: 275 nm
- FWHM: 10 nm
- Recommended fiber patch cable: FP22U, High-OH, solarization resistant, NA 0.22
 - Optical power emitted (typical maximum): 3.0 mW
- SMA905 connector (FC option upon request)

APPLICATIONS

- purification and disinfection research
- concentration of quanosine
- intrinsic fluorescence of tyrosine
- detection of carbonyl bonds
- beer bitterness units derived from light absorbance

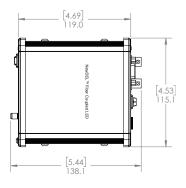

NewDEL™ Dimensions

NewDEL™ Specifications

terminal program or other suitable programming systems		
Wavelength range 275 nm Operating modes - Pulse Width Modulation Default 490Hz Custom (user set) 1-500Hz Operating modes - Internal Trigger Set Pulse Delay 10ms - 32s Set Pulse Delay 10ms - 32s Operating modes - External Trigger LED output controlled by 0-5V TTL Serial Interface RS-232, DB-9 female Converter cable RS-232 to USB-A (FTDI) is included Trigger connector Optically isolated BNC, 50 Ohms for External Trigger mode Cable not included Monitor connector BNC, 50 Ohms for reading PWM or pulse waveform Cable not included Manual operation Front panel intensity switch for Pulse Width Modulation mode Step size set by software; 1, 2, 4, 5, or 10 percent Remote Operation - Software Windows based GUI, available by download Remote Operation - Programmability Serial commands are provided to control a unit and query its status using a terminal program or other suitable programming systems	Optical coupling	
Operating modes - Pulse Width Modulation Operating modes - Internal Trigger Set Pulse Delay 10ms - 32s Set Pulse Duration 10ms - 32s Set Pulse Duration 10ms - 32s Operating modes - External Trigger LED output controlled by 0-5V TTL Serial Interface RS-232, DB-9 female Converter cable RS-232 to USB-A (FTDI) is included Trigger connector Optically isolated BNC, 50 Ohms for External Trigger mode Cable not included Monitor connector BNC, 50 Ohms for reading PWM or pulse waveform Cable not included Manual operation Front panel intensity switch for Pulse Width Modulation mode Step size set by software; 1, 2, 4, 5, or 10 percent Remote Operation - Software Windows based GUI, available by download Remote Operation - Programmability Serial commands are provided to control a unit and query its status using of terminal program or other suitable programming systems	Optical output power (typical)	3.0 mW
Operating modes - Internal Trigger Set Pulse Delay 10ms - 32s Set Pulse Duration 10ms - 32s Operating modes - External Trigger LED output controlled by 0-5V TTL RS-232, DB-9 female Converter cable RS-232 to USB-A (FTDI) is included Trigger connector Optically isolated BNC, 50 Ohms for External Trigger mode Cable not included Monitor connector BNC, 50 Ohms for reading PWM or pulse waveform Cable not included Front panel intensity switch for Pulse Width Modulation mode Step size set by software; 1, 2, 4, 5, or 10 percent Remote Operation - Software Windows based GUI, available by download Remote Operation - Programmability Serial commands are provided to control a unit and query its status using of terminal program or other suitable programming systems	Wavelength range	275 nm
Operating modes - External Trigger LED output controlled by 0-5V TTL Serial Interface RS-232, DB-9 female Converter cable RS-232 to USB-A (FTDI) is included Trigger connector Optically isolated BNC, 50 Ohms for External Trigger mode Cable not included Monitor connector BNC, 50 Ohms for reading PWM or pulse waveform Cable not included Front panel intensity switch for Pulse Width Modulation mode Step size set by software; 1, 2, 4, 5, or 10 percent Remote Operation - Software Windows based GUI, available by download Remote Operation - Programmability Serial commands are provided to control a unit and query its status using of terminal program or other suitable programming systems	Operating modes - Pulse Width Modulation	Default 490Hz Custom (user set) 1-500Hz
Serial Interface RS-232, DB-9 female Converter cable RS-232 to USB-A (FTDI) is included Trigger connector Optically isolated BNC, 50 Ohms for External Trigger mode Cable not included Monitor connector BNC, 50 Ohms for reading PWM or pulse waveform Cable not included Front panel intensity switch for Pulse Width Modulation mode Step size set by software; 1, 2, 4, 5, or 10 percent Remote Operation - Software Windows based GUI, available by download Remote Operation - Programmability Serial commands are provided to control a unit and query its status using of terminal program or other suitable programming systems	Operating modes - Internal Trigger	
Trigger connector Optically isolated BNC, 50 Ohms for External Trigger mode Cable not included BNC, 50 Ohms for reading PWM or pulse waveform Cable not included Manual operation Front panel intensity switch for Pulse Width Modulation mode Step size set by software; 1, 2, 4, 5, or 10 percent Windows based GUI, available by download Remote Operation - Programmability Serial commands are provided to control a unit and query its status using of terminal program or other suitable programming systems	Operating modes - External Trigger	LED output controlled by 0-5V TTL
Cable not included BNC, 50 Ohms for reading PWM or pulse waveform Cable not included Manual operation Front panel intensity switch for Pulse Width Modulation mode Step size set by software; 1, 2, 4, 5, or 10 percent Windows based GUI, available by download Remote Operation - Programmability Serial commands are provided to control a unit and query its status using a terminal program or other suitable programming systems	Serial Interface	
Manual operation Front panel intensity switch for Pulse Width Modulation mode Step size set by software; 1, 2, 4, 5, or 10 percent Windows based GUI, available by download Remote Operation - Programmability Serial commands are provided to control a unit and query its status using a terminal program or other suitable programming systems	Trigger connector	
Remote Operation - Software Windows based GUI, available by download Remote Operation - Programmability Serial commands are provided to control a unit and query its status using a terminal program or other suitable programming systems	Monitor connector	
Remote Operation - Programmability Serial commands are provided to control a unit and query its status using a terminal program or other suitable programming systems	Manual operation	
terminal program or other suitable programming systems	Remote Operation - Software	Windows based GUI, available by download
	Remote Operation - Programmability	Serial commands are provided to control a unit and query its status using a terminal program or other suitable programming systems
Front Panel Display Passive Matrix OLED, can be deactivated through software % PWM Intensity or trigger operating mode with frequency	Front Panel Display	Passive Matrix OLED, can be deactivated through software % PWM Intensity or trigger operating mode with frequency
Thermal management Passive cooling via conduction Internal temperature sensor/monitor readable by software	Thermal management	
Power supply Universal AC/DC Wall adapter, 90 to 264VAC at 47 to 63Hz input 12V 12W output, 1.5 m cord length, DOE VI Efficiency, Class B EMI, Safety Approvals: cUL/UL, RCM, CB, CE (international socket blade options)	Power supply	output, 1.5 m cord length, DOE VI Efficiency, Class B EMI, Safety Approvals:
Dimensions/Weight 4.7 x 4.5 x 2.0 in (119.1 x 115.1 x 51.6 mm) / 1.1 lbs (0.5 kg)	Dimensions/Weight	4.7 x 4.5 x 2.0 in (119.1 x 115.1 x 51.6 mm) / 1.1 lbs (0.5 kg)
