

Model N455 [Visible]

NewDEL[™] VIS Fiber-coupled LED

Meticulously engineered photonic tools built to advance the goals of our customers, whether they are forging new paths in scientific discovery or implementing an ongoing project.

The NewDEL[™] VIS fiber-coupled LED product group encompasses eight narrowband sources with center wavelengths ranging from 455 nm to 680 nm. The collection includes phosphor-coated green and amber LEDs to address the so-called green gap problem – the lack of a high efficacy semiconductor materials system for the green- yellow spectral region.

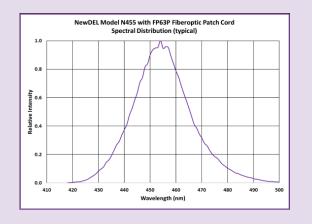

SPECIFICATIONS

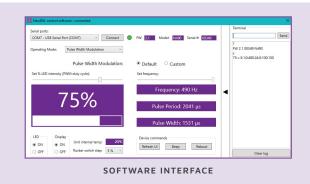

- Center wavelength: 455 nm
- FWHM: 20 nm
- Recommended fiber patch cable: **FP63P**, High-NA, Plastic Optical Fiber, NA 0.63
 - Optical power emitted (typical maximum):320 mW
- SMA905 connector (FC option upon request)

APPLICATIONS

- Photocatalytic chemistry
- Bactericidal phototherapy
- Dermatological phototherapy
- Inactivation of SARSCoV-2 in saliva
- Mycelial biomass production

500 N. Commercial St. Suite 502E Manchester, NH 03101
